Invitation for Webinar on AI in Cyber Security dated 03-12-2022

IEEE Delhi Section with Computer Society Chapter, Consultants Network Affinity Group, Life Member Affinity Group, Inter Society Relations, Industry Relations & SIGT Standing Committees of IEEE Delhi with the associations CSI, Safa Society, ISTE Delhi Section, IETE Delhi Centre, invites you for a Webinar on 19-November-2022, the Saturday, at 06:00 p.m.

Every day, the cyber-attack surface keeps on getting bigger and bigger. Threats have not only become complex but are also more difficult to get detected. On a daily basis, it is common for cyber security teams to grapple with a huge number of alerts that are difficult to analyse and take action. The sheer number of connected devices coupled with scarcity in the number of skilled security professionals makes it a daunting task for any enterprise to improve its security posture. With the advancements in AI, it is now possible for security teams to significantly reduce risks. For example, AI is a critical arsenal in the fight against cyber threats, as AI-based systems are today able to handle and quickly analyse millions of events and map this to identify different types of threats. This includes analysing new malware to identify zero-day attacks to prevent users from clicking suspicious emails. AI systems can learn from patterns of past security events and prevent the next attack from taking place. The webinar aims to discuss various aspects of the AI in Cyber Security.
