## **Generative AI**

IEEE Delhi Section with Computer Society Chapter, Consultants Network Affinity Group, Life Member Affinity Group, Inter Society Relations, Industry Relations & SIGHT Standing Committees of IEEE Delhi with the associations CSI, Safa Society, ISTE Delhi Section, IETE Delhi Centre, invites you for a Webinar on 29-June -2024, the Saturday, at 06:00 p.m.

Generative AI is a branch of artificial intelligence focused on creating new content, such as images, text, music, and videos, using sophisticated algorithms trained on large datasets. It employs deep learning techniques to understand patterns in data and generate novel outputs. Training generative AI models involves feeding them with known data and adjusting internal parameters through backpropagation. While computationally intensive, generative AI offers endless possibilities for creativity and innovation across various domains.
