	IEEE Delhi Section with **Computational Intelligence Society, Computer Society, Communication Society, Consultants Network Affinity Group, Life Members Affinity Group, Inter Society Relations, Industry Relations, TEMS, SMC, SIGHT Standing Committees of IEEE Delhi Section and Region-10** with following associations	**IEEE** Advancing Technology for Humanity — IEEE Delhi Section

CSI Delhi Chapter	Computer Society Chapter IEEE Delhi Section	IITP New Delhi	IETE New Delhi	IEEE Computational Intelligence Society — IEEE Delhi Section

Invite you for a Free **Webinar** on **14-12-2024**, **the Saturday,** at **06:00 p.m.**
as per the details given hereunder:-

Speaker	**Mr. Vijay Arora** Associate Director – Technology, Nagarro
Date and Time Schedule	**14-December-2024, the Saturday,** from **06:00 p.m.** to **07:30 p.m.**
Title of the Talk	**AI Tools in Software Development for Productivity Improvement**
Venue and Contact Details	**CISCO WebEx Meeting** Platform CISCO WebEx Event ID and Password shall be sent on E-Mail to the registered participants, at-least one day in advance. Please check your Spam and other folders also for our emails and mark it as SAFE / NOT SPAM.
Programme Schedule	**05:30 p.m.** to **06:00 p.m.** – Login, online Networking and Tea (at Home) **06:00 p.m.** to **07:00 p.m.** – Technical Talk **07:00 p.m.** to **07:30 p.m.** – Q & A Session followed by Certification
Registration Link and Fee	**Registration Link: http://bvicam.ac.in/webinars/** **No registration fee. It is absolutely free for the members** of **IEEE, CSI, IETE, ISTE, ISCA, IITP** and **Bharati Vidyapeeth,** with pre-registration
Abstract of the Talk	In every phase of software development life cycle (SDLC), AI tools are transforming how we build software by making the process faster and smarter. These tools help developers by automating tasks, improving the quality of code, and speeding up problem-solving. For example, AI-powered code editors like GitHub Copilot can suggest code, complete functions, and even write whole sections of a program. AI tools can also test code, find bugs, and suggest improvements, which saves a lot of time in debugging. In addition, AI can help improve security by identifying issues in the code before developers release production ready software. In project management, AI can predict problems, help manage tasks, and make projects run more smoothly. Overall, learning to use AI tools in software development can help developers create better software, faster and improve their skills for the future.

All are welcome:
Please circulate this to all your interested colleagues, associates and friends. Please register in large numbers and derive maximum benefit. **Advance registration is mandatory for participation. Participants will also get Participation Certificate.**

(Prof. M. N. Hoda) Director, BVICAM, New Delhi	**(Prof. Subrata Mukhopadhyay)** Chairperson, CNA Group, IEEE DS
