

Bharati Vidyapeeth
New Delhi

IEEE Delhi Section with Computational Intelligence Society, Computer Society, Communication Society, Consultants Network Affinity Group, Life Members Affinity Group, Inter Society Relations, Industry Relations, TEMS, SMC & SIGHT Standing Committees of IEEE Delhi Section with following associations

IEEE Delhi Section

CSI Delhi Chapter

Computer Society Chapter
IEEE Delhi Section

IITP New Delhi

IETE New Delhi

IEEE Delhi Section

Invite you for a Free **Webinar** on **01-10-2022, the Saturday**, at **06:00 p.m.** as per the details given hereunder:-

Speaker

Mr. Ganesh Sahai

Global CTO, Nagarro

Date and Time Schedule

01-October-2022, the Saturday, from 06:00 p.m. to 07:30 p.m.

Title of the Talk

AI based Transformer Technologies

Venue and Contact Details

CISCO WebEx Meeting Platform

CISCO WebEx Event ID and Password shall be sent on E-Mail to the registered participants, at-least one day in advance. Please check your Spam and other folders also for our emails and mark it as SAFE / NOT SPAM.

Programme Schedule

05:30 p.m. to 06:00 p.m. – Login, online Networking and Tea (at Home)

06:00 p.m. to 07:00 p.m. – Technical Talk

07:00 p.m. to 07:30 p.m. – Q & A Session followed by Certification

Registration Link and Fee

Registration Link: <http://bvicam.ac.in/webinars/>

No registration fee. It is absolutely free for the members of IEEE, CSI, IETE, ISTE, ISCA, IITP and Bharati Vidyapeeth, with pre-registration

Abstract of the Talk

One of the interesting areas of usage of technology has been how can we make machines take instructions like humans and perform various activities for example, asking to draw a water colour portrait of kids playing basketball along with robots during sunset with Golden Gate bridge in the background, or, asking a robot to go and fetch a glass of water from the kitchen, etc. These common human conversations when done with machines involve lot of tech around NLP (Natural Language Processing). Transformer is one such tech based on deep learning models which cater to these kind of use cases. This tech has evolved a lot over the years. In recent times, tech from OpenAI (GPT, Dall-E), Google (Google Brain, LaMDA, PaLM), Microsoft (IntelliSense, Github Copilot), etc. are revolutionizing the way machines work and in future looks like such tech can replace lots of human work. It looks like that in future this kind of tech and machines would be in many ways at par with humans. Sounds super and scary at the same time. The webinar aims to discuss various aspects of the transformer technologies.

All are welcome:

Please circulate this to all your interested colleagues, associates and friends. Please register in large numbers and derive maximum benefit. **Advance registration is mandatory for participation. Participants will also get Participation Certificate.**

(Prof. M. N. Hoda)

Director, BVICAM, New Delhi

(Prof. Subrata Mukhopadhyay)

Chairperson, CNA Group, IEEE DS
