Abstract of the Talk

This webinar is designed to unravel the complexities of design thinking and provide attendees with practical strategies to incorporate this powerful methodology into their everyday work. Led by Richa Sarabahi who has extensive experience in design thinking across diverse domains, this session will delve into the fundamental principles and techniques that drive successful design thinking processes. Through real-life case studies and examples, participants will gain a deep understanding of how to empathise with users, define problem statements, ideate innovative solutions, prototype, and test their designs. Whether you're a novice designer or a professional from any field looking to enhance your problem-solving skills, this webinar promises to demystify design thinking and equip you with actionable insights to unlock your creative potential. Don't miss this opportunity to discover practical approaches for harnessing the power of design thinking in your everyday endeavours. Let's embark on a transformative journey towards becoming a more empathetic, innovative, and user-centered problem solver.

All are welcome:

Please circulate this to all your interested colleagues, associates and friends. Please register in large numbers and derive maximum benefit. **Advance registration is mandatory for participation. Participants will also get Participation Certificate.**
