Abstract of the Talk

Robotics Process Automation (RPA) initially focused on scripting and automating IT-driven business process. Nowadays, RPA enables more effective IT operations, increasing speed, agility and cost effectiveness. Software robots have become dependable digital companion, giving us the time and freedom to think, plan and focus. They automate the interaction between humans and their technology-enabled processes. It also helps to relieve the pressure on organizations to deliver more with less. The webinar aims to discuss various aspects of applications of Robotics Process Automation.

All are welcome:

Please circulate this to all your interested colleagues, associates and friends. Please register in large numbers and derive maximum benefit. **Advance registration is mandatory for participation. Participants will also get Participation Certificate.**
