**Abstract of the
Talk**

Industry surveys project that Software Defined Networking (SDN) is going to redefine the networking and the cloud world. This is the biggest technological change that has happened in networking field in last 30 years. SDN is a new way to Design, Build and Operate Networks. There is a need to Innovate in the Network. We've seen tons of innovation in applications, devices, computing and storage, yet the underlying network that connects everything has remained unchanged. SDN Opens the Network Up for Innovation. It replaces static, inflexible and complex networks, with networks that are agile, scalable and innovative. The webinar aims to discuss all round technological perspective of SDN.

All are welcome:

Please circulate this to all your interested colleagues, associates and friends. Please register in large numbers and derive maximum benefit. **Advance registration is mandatory for participation. Participants will also get Participation Certificate.**
