Abstract of the Talk

In today's era, mobile apps are frequently used and installed in every hook and corner of the phone. In order to make it reachable, it has become imperative to go mobile and have an app for promoting, selling and interacting with their customers. But, all app stores these days are flooded with billions of apps for the user to download and use. It is absolutely necessary for engineering leaders, teams and developers to use a cutting-edge techs and instrument to develop the next hit app, or to forever disappear into oblivion. The webinar will discuss on mobile technologies with its revolution, and how the engineers in the market are adapting with the new available frameworks. The webinar will also discuss its all round perspective including the real-time issues and challenges.

All are welcome:

Please circulate this to all your interested colleagues, associates and friends. Please register in large numbers and derive maximum benefit. **Advance registration is mandatory for participation. Participants will also get Participation Certificate.**
