Course Code: MCA-114   **Course Name: Full Stack Development**

Assignment - 3

(Based on Unit - IV)

		Marks	BTL	CO
Q1.	Create the collection in MongoDB.	(4)	BT6	CO 5
Q2.	Create a simple micro blogging application (like twitter) that allows people to post their content which can be viewed by people who follow them	(4)	BT6	CO 5
Q3.	Implement a full-stack application where you have a React front-end that communicates with a Node.js back-end. The application should allow users to enter a name and email address in a form on the front-end, which will be sent to the server and stored in a database. Additionally, the front-end should fetch and display a list of all stored users from the server.	(4)	BT6	CO 5
